Chelsea Building Products Opens New Facility in Westmoreland County *Ribbon Cutting Marks Chelsea Building Products' Expansion*

OAKMONT, PA (May 6, 2026) – Chelsea Building Products, an Oakmont, PA-based vinyl extruder and building-product component manufacturer with more than 50 years in the region, celebrated the grand opening of its new 228,000 square-foot facility in Madison, PA. A ribbon-cutting ceremony was attended by employees, customers, elected officials and business leaders, including Peter Dewil, CEO of Chelsea Building Products; Gary Hartman, vice president of Chelsea Building Products; and Dan DeBone, president and CEO of the Westmoreland County Chamber of Commerce, along with ownership and management from aluplast group.

The new facility, being called Chelsea Building Products East, represents a significant investment in advanced manufacturing technology, regional job creation and the continued growth of the greater Pittsburgh-area economy. Strategically located with access to major transportation corridors, the facility is designed to enhance production efficiency and strengthen the company's ability to serve customers across North America.

The Madison facility will support the Company's expanding manufacturing operations by extruding PVC-based window and door profiles, while also housing state-of-the-art blending and lamination operations. This blending facility will supply proprietary PVC compounds to both Chelsea Building Products East and its sister operation in Greenville, Texas, further integrating the company's production network.

"Chelsea Building Products is continuing to invest in the future of manufacturing across Western Pennsylvania," said Peter Dewil, CEO of Chelsea Building Products. "This facility reflects our long-term commitment to innovation, operational excellence and sustainable job creation in the communities where we operate. It strengthens our ability to serve customers while supporting economic growth in the region."

Chelsea Building Products will employ between 100 and 150 workers within five years, creating new opportunities in skilled manufacturing, engineering and operations.

"Opening this facility represents a new chapter for Chelsea Building Products," said Gary Hartman, vice president of Chelsea Building Products. "It enhances how we operate at every level, giving us greater flexibility, strengthening our supply network and ensuring we continue to deliver the high level of performance our partners expect."
